

Barcode Singles 1D

Version 5.x

1D Barcode Font Kits - PC Format

Barcode Singles is a comprehensive collection of barcode fonts and Utilities that allow users to create and print their own barcodes from within Windows and are available to be purchased and licenced across many combinations of environments.

Important Note:

Barcode fonts can not be used to simply apply to a string of data characters/digits, like other 'normal' fonts.

The Result may look like a barcode, it will print, but it will NOT work, and NOT scan!

The data strings MUST be encoded or modified in some way using the various tools provided.

Terminology

Barcode types, have some different names, older, newer and are actually the same or derivatives of the same barcode type.

Use the right Barcode for the job required.

This is often pre-determined, some type are restricted for certain use such as Retail or Shipping or Medical and require registration!

Features

- Produce barcodes from within Windows
- Automatic error checking and encoding
- Fully integrated into Microsoft Office
- Add-in for MS Word, MS Excel
- Extends Excel Functions

- UPC-E

Fonts v Graphics

Fonts

Barcodes made from fonts give great flexibility to produce unlimited variable barcodes, however the barcode data "Strings" need some sort of encoding, sometimes simple, sometimes complex.

Advantages of Barcode Fonts

- Fonts are Fully Scalable, with Human readable text options
- Create as many variable as you require
- Easy to insert where required
- Low storage (not graphic)

Graphics

A Graphics option is provided in the Windows Utility, suitable when requiring a smaller number of barcode images, or infrequent usage.

Installer

The Installer is made as an .msi package so can be used on user to enterprise setups.
The Installer is locale neutral and will allow custom component installation as required.

Tools

Barcode Singles provides the tools to enable easy encoding in a number of ways:

Barcode Utility

Windows user based for adhoc barcodes text based or Graphics images, and file batch conversion.
Provides error checking, and checksums
Allows you to enter manual data for single barcodes to cut & paste
Optionally: Produces graphics Image file of Barcode created
